Background Information

The Candidate List is a list of substances that may have serious effects on human health or the environment. Substances on the Candidate List are also known as "substances of very high concern". The aim of publishing such a list is to inform the industry and general public that

these substances are candidates for inclusion in the Authorisation List. The inclusion in the candidate list also triggers further information obligations for industry and gives consumers the possibility to request information on these substances in articles. ECHA regularly prioritises the substances included in the Candidate List and recommends to the Commission their inclusion to the Authorisation List. Once they are on the Authorisation List, industry will need permission to continue using the substance after the sunset date.
