

# Coronavirus disease (COVID-19)

## Situation Report – 139

Data as received by WHO from national authorities by 10:00 CEST, 07 June 2020

### Highlights

---

[A joint task force has been established by the WHO Regional Office for Europe and the Central European Initiative](#) to strengthen regional coordination for the COVID-19 response and mitigate the impact of the pandemic. The task force will serve as a strategic platform for updating member states, exchanging information, and sharing experiences, best practices and training.

---

This year on World Food Safety Day on 7 June, the WHO Regional Office for Europe has reminded everyone of the [Five Keys to Safer Food](#), which are [basic principles that each individual should know to prevent foodborne diseases](#), some of which (such as handwashing) also offer protection from COVID-19. The WHO Regional Office for the Americas stated that [traditional markets, particularly those which sell live animals, may represent a risk of transmission of diseases between animals and humans \(zoonotic diseases\)](#), and that appropriate regulations and inspections for the production and sale of live animals are needed to prevent the spread of emerging diseases.

---

### Situation in numbers (by WHO Region)

Total (new cases in last 24 hours)

---

<b>Globally</b>	6 799 713 cases (136 409)	397 388 deaths (4 586)
<b>Africa</b>	131 324 cases (4 763)	3 148 deaths (86)
<b>Americas</b>	3 234 875 cases (79 505)	179 394 deaths (3 227)
<b>Eastern Mediterranean</b>	623 684 cases (18 658)	14 326 deaths (302)
<b>Europe</b>	2 268 311 cases (18 312)	183 732 deaths (604)
<b>South-East Asia</b>	350 542 cases (13 965)	9 672 deaths (356)
<b>Western Pacific</b>	190 236 cases (1 206)	7 103 deaths (11)

---

# Surveillance

Figure 1. Number of confirmed COVID-19 cases reported in the last seven days by country, territory or area, 01 June to 07 June\*\*

\*\*See [Annex 1](#) for data, table and figure notes.

Figure 2. Number of confirmed COVID-19 cases, by date of report and WHO region, 30 December 2019 through 07 June 2020\*\*

\*\*See [Annex 1](#) for data, table and figure notes.

**Table 1. Countries, territories or areas with reported laboratory-confirmed COVID-19 cases and deaths, by WHO region. Data as of 10 AM CEST, 07 June 2020\*\***

Reporting Country/ Territory/Area	Total confirmed cases	Total confirmed new cases	Total deaths	Total new deaths	Transmission classification <sup>i</sup>	Days since last reported case
Africa						
South Africa	45 973	2 539	952	44	Community transmission	0
Nigeria	12 233	389	342	9	Community transmission	0

## Case definitions

WHO periodically updates the [Global Surveillance for human infection with coronavirus disease \(COVID-19\)](#) document which includes surveillance definitions.

### Definition of COVID-19 death

COVID-19 death is defined for surveillance purposes as a death resulting from a clinically compatible illness in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID-19 disease (e.g. trauma). There should be no period of complete recovery between the illness and death.

Further guidance for certification and classification (coding) of COVID-19 as cause of death is available [here](#).

---

## Annex 1: Data, table and figure notes

Caution must be taken when interpreting all data presented. Differences are to be expected between information products published by WHO, national public health authorities, and other sources using different inclusion criteria and different data cut-off times. While steps are taken to ensure accuracy and reliability, all data are subject to continuous verification and change. Case detection, definitions, testing strategies, reporting practice, and lag times differ between countries/territories/areas. These factors, amongst others, influence the counts presented, with variable underestimation of true case and death counts, and variable delays to reflecting these data at global level.

The designations employed, and the presentation of these materials do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement. Countries, territories and areas are arranged under the administering WHO region.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

<sup>[1]</sup> All references to Kosovo should be understood to be in the context of the United Nations Security Council resolution 1244 (1999). In the map, number of cases of Serbia and Kosovo (UNSCR 1244, 1999) have been aggregated for visualization purposes.

Counts reflect laboratory-confirmed cases and deaths, based on [WHO case definitions](#), unless stated otherwise (see Country, territory, or area-specific updates and errata), and include both domestic and repatriated cases.

Other\*: includes cases reported from international conveyances.

Due to the recent trend of countries conducting data reconciliation exercises which remove large numbers of cases or deaths from their total counts, WHO will now display such data as negative numbers in the “new cases” / “new deaths” columns as appropriate. This will aid readers in identifying when such adjustments occur. When additional details become available that allow the subtractions to be suitably apportioned to previous days, graphics will be updated accordingly. Prior situation reports will not be edited; see [covid19.who.int](https://covid19.who.int) for the most up-to-date data.

### Additional table notes

<sup>i</sup> Transmission classification is based on a process of country/territory/area self-reporting. Classifications are reviewed on a weekly basis, and may be revised as new information becomes available. and. Differing degrees of transmission may be present within countries/territories/areas; classification is based on the highest category reported within a country/territory/area. Categories:

- No cases: with no confirmed cases
- Sporadic cases: with one or more cases, imported or locally detected.

- Clusters of cases: experiencing cases, clustered in time, geographic location and/or by common exposures.
- Community transmission: experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: large numbers of cases not linkable to transmission chains; large numbers of cases from sentinel lab surveillance; and/or multiple unrelated clusters in several areas of the country/territory/area.
- Pending: transmission classification has not been reported to WHO.

ii “Territories” include territories, areas, overseas dependencies and other jurisdictions of similar status.

### **Country, territory, or area-specific updates and errata**

- **Update 7 June 2020, Brazil:** As of 6 June, WHO will report the sum of the cumulative data reported by the Ministry of Health of Brazil as of 4 June and the daily reported cases and deaths thereafter, available at: <https://covid.saude.gov.br/>
