attesa 2026

ISO 12100:2010  
in revisione:  
attesa 2026

ID 22983 | 21.11.2024 / News seguita

Il Documento attualmente in sviluppo (DIS), è alla fase 4 (di registrazione) del life cycle di ISO e potrebbe raggiungere la fase 6 (di pubblicazione) nel 2026.

Seguiranno l'armonizzazione CEN (EN) e la pubblicazione UNI (UNI EN).

L'edizione della norma attualmente in vigore 2010 (1a), è stata in sviluppo per 2 anni dal 2008 al 2010.

ISO/DIS 12100 Safety of machinery - General principles for design - Risk assessment and risk reduction

**Under development / DIS registered 11.10.2024**

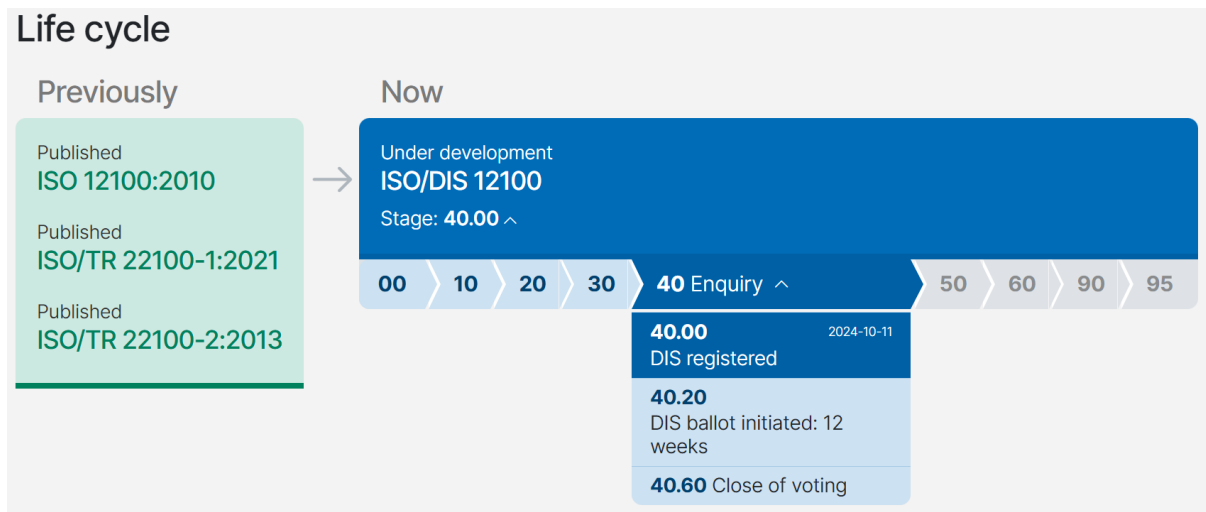

This Draft International Standard is in the enquiry phase with ISO members.

ISO 12100:2010 specifies basic terminology, principles and a methodology for achieving safety in the design of machinery. It specifies principles of risk assessment and risk reduction to help designers in achieving this objective. These principles are based on knowledge and experience of the design, use, incidents, accidents and risks associated with machinery. Procedures are described for identifying hazards and estimating and evaluating risks during relevant phases of the machine life cycle, and for the elimination of hazards or sufficient risk reduction. Guidance is given on the documentation and verification of the risk assessment and risk reduction process.

ISO 12100:2010 is also intended to be used as a basis for the preparation of type-B or type-C safety standards.

It does not deal with risk and/or damage to domestic animals, property or the environment.

Status: Under development  
 Stage: DIS registered [40.00]  
 Edition: 2  
 Technical Committee: ISO/TC 199
