

16% of imported products inspected
contained hazardous substances exceeding
safe levels

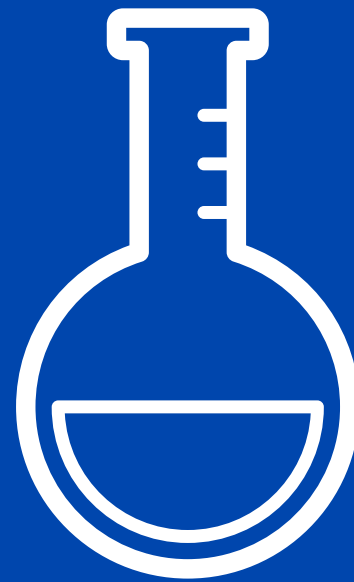

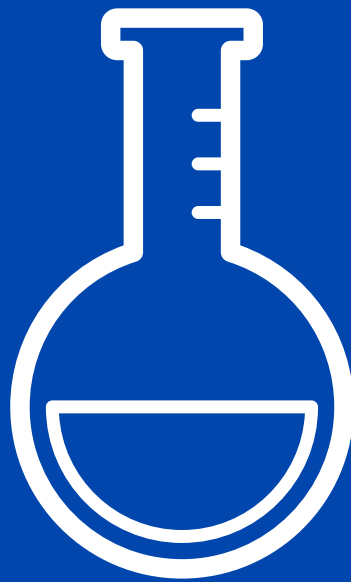

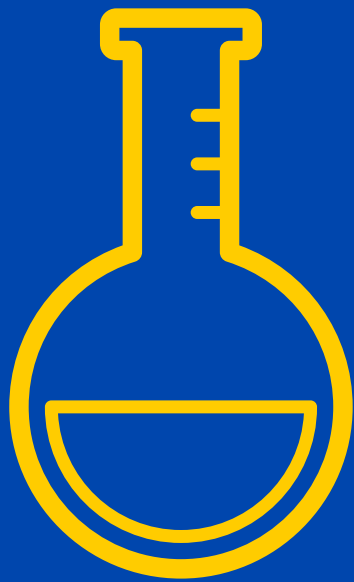

Most issues were found in jewellery – lead,
cadmium and nickel exceeded safe limits

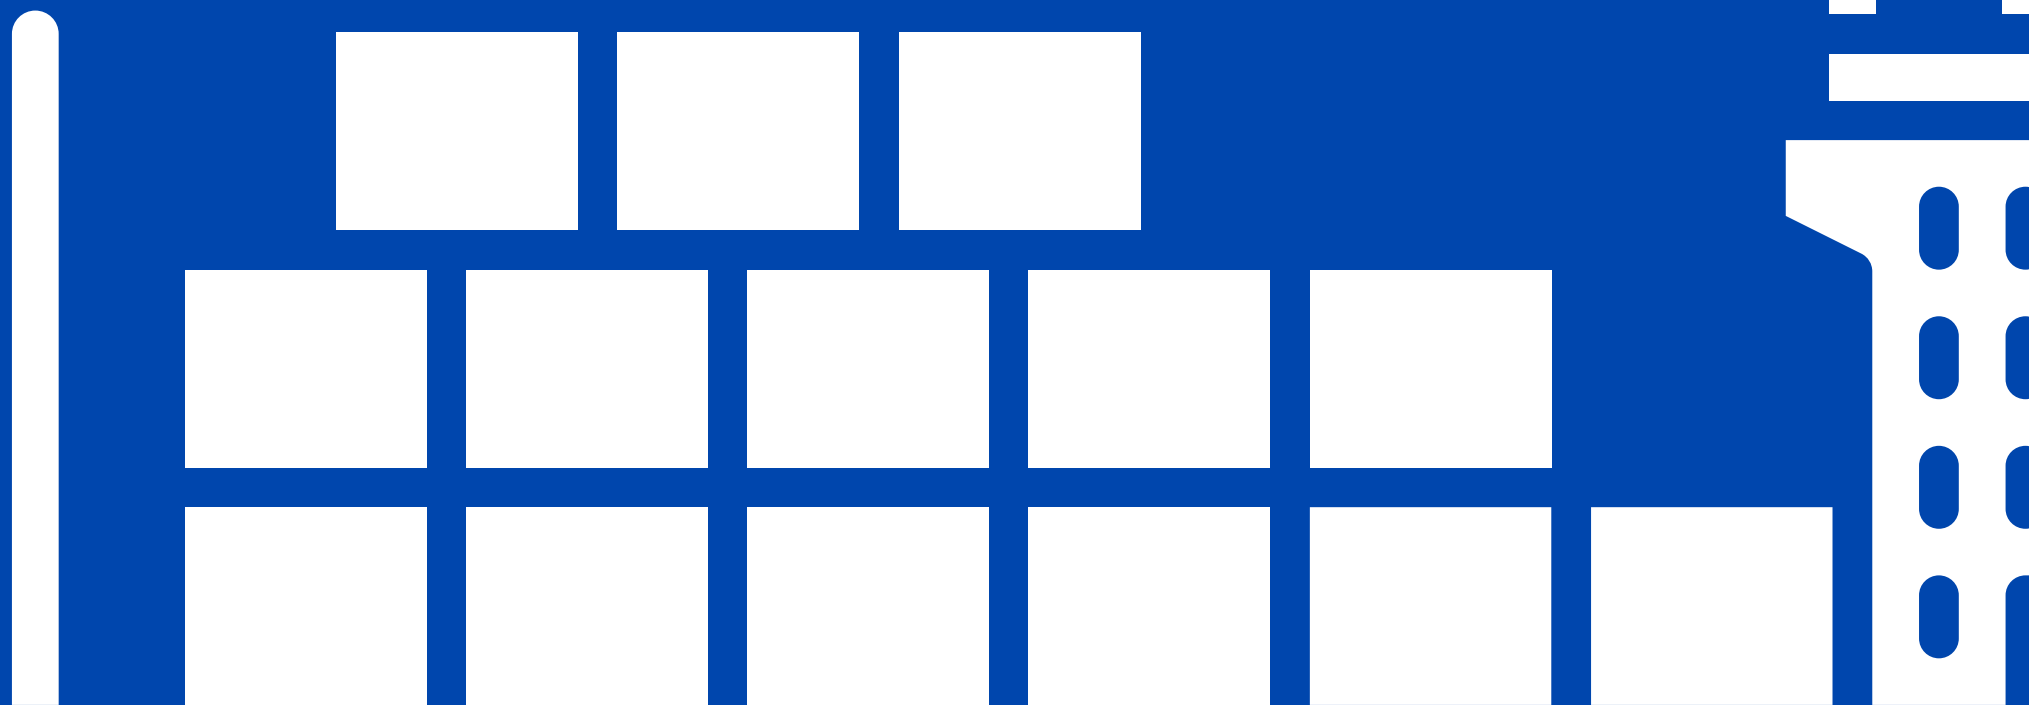

But also in **toys and textiles**, where e.g. cadmium, phthalates, chromium VI and formaldehyde were found exceeding safe limits

1 out of 3 of checked imported
substances in mixtures lacked a valid
REACH registration

When importing products or chemicals,
make sure you **understand and meet**
your obligations under the EU chemicals
laws
