

Explanatory note

Introduction:

Article 95(1) of the Biocidal Products Regulation (BPR) requires ECHA to publish the List of Relevant Substances and Suppliers. Relevant substances are the combinations of active substances (AS), and substances generating an AS, with the product-type(s) (PT) for which a dossier ("the complete substance dossier") has been submitted and accepted/validated by a Member State under the BPR or Directive 98/8/EC. The substances listed in Annex 1, Category 6 of the BPR are also subject to the Article 95 obligations (Article 95(6) of the BPR). These substances do not have a PT.

AS/PT combinations for which a non-approval decision is adopted by the European Commission are no longer considered as Article 95 relevant. ECHA will remove such AS/PT combinations from the Art. 95 list once the Commission decision is adopted. Suppliers concerned by the non-approval of their AS/PT combination are advised to verify with their Member State Competent Authority how long they can stay on the market.

AS/PT combinations in the Review Programme (RP) which have been withdrawn during the evaluation ("timely withdrawal") as per Art. 11(a), (b), or (d) of the RP Regulation, are no longer Article 95 relevant. For transparency, ECHA will move these AS/PT to the annex of the Article 95 list until the Commission has taken a non-approval decision according to Art. 20 of the RP Regulation, or until – following a successful invitation to notify – a new AS dossier has been submitted and validated as complete by a Member State under the BPR. The AS/PT combination can stay on the market in line with Article 89(2) of the BPR. In case of a late withdrawal, the AS/PT combination remains Article 95 relevant until the Commission has taken its decision on the AS/PT combination. The status of the AS/PT combination will be indicated as "Withdrawn – Awaiting Commission decision". In both cases, the participants will be indicated as 'Former RP participant'.

If an AS in the RP is redefined during the evaluation (Article 13 of Regulation (EU) No 1062/2014), ECHA will remove the 'old' AS entry from the Article 95 List (and add the new AS entry instead). ECHA will invite interested third parties to make a notification to take over as participant for the 'old' substance identity. The 'old' AS can stay on the market during the notification period, and also beyond if a compliant notification is received in line with Article 89(2) of the BPR. The requirement to be on the List of active substances and suppliers under Article 95 of the BPR does not apply in case of the "old" AS until a complete substance dossier is submitted and validated.

Structure of this list:

This list is structured per AS and PT. It includes the name and country of the relevant suppliers, if they are substance suppliers and/or product supplier, and the date of their inclusion in the list.

Inclusion reasons: Suppliers may be included on this list if they are participants in the RP ('RP Participant'), supporters of AS benefitting from the transitional measures of Article 93 of the BPR ('Article 93'), supporters of other AS ('AS not in the RP'), submitters of product authorisation applications where the application includes an alternative AS dossier ('Third Party Dossier'), submitters of applications with a complete substance dossier or a letter of access to a complete substance dossier or making reference to a complete substance dossier for which all data protection periods have expired under Article 60 in accordance with Article 95(1) of the BPR which have been found compliant by ECHA ('Art.95 submission'), and submitters of applications in accordance with Article 95(1) of the BPR where the application refers to a complete substance dossier for which all data protection periods have expired under Article 95(5) ('Art.95(5) submission').

Types of suppliers: A substance supplier is an entity who manufactures or imports a relevant substance on its own or in biocidal products. A product supplier is an entity who manufactures or makes available on the market a biocidal product consisting, containing or generating that relevant substance.

Inclusion Date: Prior to 01/09/2022 the column for "Inclusion Date" indicated the date of entry of the supplier. In case of name change or intra-group transfers the initial inclusion date of the original participant was kept. As of 01/09/2022, a new column is added to clarify the inclusion date of the AS-PT ("InclusionDateASPT") in contrast to the inclusion date of the supplier ("InclusionDateSupplier"). All changes to participants including intra group transfers (and with the exception of name changes) will receive the "Inclusion Date Supplier" of the day the change was accepted by ECHA. Intra group transfers where the initial inclusion date was kept in the past (prior to 01/09/2022) will not be updated retrospectively. "InclusionDateSupplier" relates to the ECHA decision to include the supplier and does not precisely correlate to the date of publication of the version of the Article 95 list where the supplier was included.

For certain in-situ generated substances there is no biocidal product (precursor) made available on the market (e.g. substances generated in situ from ambient air or water): The substances are included on the Article 95 list because they are "relevant substances" in the sense of Article 95(1) in so far as an approval application dossier has been accepted or validated under the BPD or BPR. Article 95(2) does not apply unless a biocidal product is made available on the market. Accordingly, the supplier type for these substances is relevant only for biocidal product suppliers.

Disclaimer:

This explanatory note aims to bring transparency and understanding regarding how ECHA manages the list of suppliers established under Article 95 of the Biocidal Products Regulation (BPR). However, users are reminded that the text of the BPR (and its implementing and delegated acts) is the only authentic legal reference. Only the Court of Justice of the European Union can give authoritative interpretations on the contents of Union law.
