Annex A (normative) Impact test method for guards on machines ........................................... 63
Annex B (informative) Equipment for impact test and examples of tested materials .................. 66
Annex C (informative) Illustrative figures as examples of machines ........................................ 68
Annex D (informative) Illustrative figures as examples of guards ........................................... 77
Annex E (informative) Examples of the integration of exhaust and extinguishing systems when using combustible coolants or combustible dust .................. 84
Annex F (informative) Provisions when using combustible coolants and combustible dust ........... 86
Annex G (normative) Gravity-loaded axes ................................................................................. 90
Annex H (informative) Examples: Concept for leaving/returning to a cabin (control station) at Group 3 and Group 4 machines ............................................. 97
Annex I (informative) Typical demand rates of safety functions for calculations according to Table 5 and Annex J ............................................................ 99
Annex J (normative) Safety functions ...................................................................................... 104
Annex K (normative) Noise emission measurement .................................................................. 151
Bibliography ........................................................................................................................ 153
